Commitments to providing assistance

Grand Central is committed to helping people use the railway network with confidence, considering the wide range of different needs of the communities we serve.

Grand Central strives to provide rail services which are truly accessible to all, so that customers can travel in confidence, safe in the knowledge that extra help is available at each stage of their journey, when needed.

Our commitment to helping all customers to travel with confidence includes offering the following:

- co-ordinating assistance at stations and on our trains, or when making connections
- alternative accessible transport when stations or trains are inaccessible
- clear, consistent and up-to-date customer information
- discounts to reduce the cost of travel for disabled people and a companion.

This document, our **Accessible Travel Policy**, sets out our policies and approach towards providing assistance for older and disabled customers, and those who simply need some extra help to make their journey.

Our customer leaflet, '**Making Rail Accessible: Helping Older and Disabled Passengers**' provides a handy summary guide, explaining what we do to assist older and disabled customers who travel with us and the standards of service they can reasonably expect. It is available upon request at all the staffed stations which we serve and on our website:

www.grandcentralrail.com/help/travel-assistance/accessible-travel-policy/

In this policy document, our aim is to provide information to help you understand how we plan to meet your expectations when you are travelling with Grand Central. We will explain how to find details of the assistance available, facilities and information you will need to help you to plan your journey.

Booking and providing assistance

Passenger Assist

Grand Central participate in an assistance booking system called **Passenger Assist** which we recommend you use to arrange your travel assistance requirements in advance. This is a rail industry-wide system used to book assistance at stations for passengers during their journey and to reserve seats and wheelchair spaces on trains where reservations are available. Our Passenger Assist team will discuss your requirements and organise assistance at any station that is accessible to you during the hours that trains are scheduled to serve that station. We consider your individual needs to ensure there is sufficient time to make any connections in your journey. Details of train times are included on the individual station pages of the National Rail Enquiries website: www.nationalrail.co.uk. We can also provide station information by post on request, including in alternative formats such as large print.

We work to agreed processes with other train companies and station operators for booking and providing assistance. This means that if your journey involves a change of train onto other operators' services, assistance can be booked through a single point of contact. We can book assistance for your whole rail journey, even where part of the journey is with other train operators or where it involves stations where our services call but where there are no Grand Central staff. By using the Passenger Assist booking system, we ensure information is relayed between station and train operators automatically at all stages of the journey.

As Grand Central does not manage or operate any of the stations at which our services call, we have very limited station-based staff presence, therefore we work in partnership with the relevant station operator through the Passenger Assist booking system to provide staff who are responsible for the station-based elements of passenger assistance. So for example, at York Station the assistance you require in and around the station, getting you to the correct platform and helping you to board is provided by LNER. This is also the case in respect of when trains are re-platformed at short notice – the station operator provides the staff to assist you in getting to the correct platform. Our Senior Conductors on-board the train are notified of all assistance bookings via their smart device and will therefore ensure that a member of the on-board team is available to assist you at the interface between platform and train. Our Customer Service Assistants (CSAs) onboard our trains have now also been upskilled in the use of ramps and therefore offer a further point of support for customers who require to board or alight using a wheelchair or mobility scooter .

We will also offer you the opportunity to purchase tickets for your journey when booking assistance and, where it is possible, make reservations on trains including priority seats and wheelchair spaces. Tickets can be collected from ticket machines when available at stations or can be dispatched by post (please allow five working days for delivery).

To book assistance, please contact our Passenger Assist team who are available as follows:

Telephone: 0345 603 4852 opt. 1 (*open 7 days, 24 hours excluding Christmas Day*)

Text Relay: 18001 0345 603 4852 opt. 1 (*open 7 days, 24 hours excluding Christmas Day*)

Online: www.grandcentralrail.com/help/travel-assistance/passenger-assistance

We will provide booking confirmation by email, where you have provided your details; or via the App if this is how the booking request was made, or by post if requested.

We aim to provide sufficient resourcing so that your call will be answered within 30 seconds and to respond to online requests within 12 working hours. We monitor our performance against these targets on a regular basis.

Alternatively you can book using the national Freephone number:

National Freephone Passenger Assist: 0800 022 3720

Textphone Free SMS Passenger Assist Forwarding Service: 0845 60 50 600

Recommended notice period for booking assistance through Passenger Assist

To help you with your travel needs, Passenger Assistance can be booked up to 2 hours before your journey. Note that for short notice assistance bookings or “turn up and go” assistance requests, we cannot guarantee seat availability on train services unless you have reserved your seat in advance.

However, many of the stations that we serve are staffed and all our trains have Senior Conductors, so where staff are available, they will always help you or suggest options for your journey, where reasonably practicable.

Assistance at stations

Grand Central train services currently call at 17 different stations, none of which are managed or operated by Grand Central and the facilities at these stations vary considerably. Some of these stations are staffed by the station operator, while some have staff presence for part of the day and the remainder have no station-based staff.

When booking assistance, if your journey involves a station which does not have staff available at the time you are travelling, our Passenger Assist team will take this into account, together with the type of assistance you require and the overall accessibility of the station to ensure you can complete your journey. If our Passenger Assist team believes you may not have access to sufficient assistance at a particular station, they will discuss options with you and provide an alternative journey plan, assistance or transport to get you to your destination at no additional cost.

If you have not booked assistance when you arrive at a station, please speak with a member of staff or at an unstaffed station make use of the Help Point, where available, to speak with Customer Services.

Station Help Points are installed and serviced by the Station Operator and enable customers to speak to a human operator where station staff are unavailable. Help Points can be used to:

- Request live service updates
- Get assistance if you require help boarding or alighting
- Report accessibility issues or station faults

How to use a Help Point:

1. Press the assistance button for non-emergency support (e.g. requesting a ramp or checking train times)
2. Press the emergency button only in the case of urgent safety concerns.
3. Follow the Operator's instructions and stay near the Help Point if assistance is being arranged, or tell the Operator where you will be.
4. For more information on the detailed locations of Help Points on station platforms, refer to National Rail Enquiries website

Where accessible, you may proceed to the platform and attract the attention of on-board staff, either visually or audibly, when the train arrives. Our on-board staff can help you board our service, take your seat, assist with luggage and help you alight at your destination station; however, they cannot assist you beyond the platform. If you are not able to do any of the above, please call the national free phone passenger assist line on **0800 022 3720** who can then arrange assistance or alternative means of getting you to your destination.

All stations at which we call have customer information screens and public announcements to keep you informed. In the event these are not working, then please speak to a member of station staff, or at unstaffed stations make use of Help Points, call our Customer Relations team (**T: 0345 603 4852 opt 4**), or refer to our website or Twitter feed.

When you have boarded a train, the Senior Conductor onboard will communicate with your destination station staff, where appropriate, to ensure you are provided with assistance to get off the train. This communication will be to a member of destination station staff responsible for receiving these calls via a dedicated telephone number at the station using the agreed industry Handover Protocol. The Handover Protocol covers both booked assistance and turn up and go travel.

On arrival at the train's final destination station, our staff will ensure that customers who have booked through Passenger Assist are helped off the train as soon as possible and in any event within five minutes of the train's arrival into the station.

Boarding Ramps

Portable ramps are available on board all our trains and at staffed stations to facilitate boarding and getting off trains. The ramps are specifically designed to suit the train you are travelling on, so that customers with reduced mobility can safely move onto and off the trains. During 2025, we have invested in new ramps on board our fleet of x10 Class 180 trains which are easier for staff to operate.

Ramps are available for all customers who require such assistance. If you have not booked assistance, please advise a member of station staff where available, or the Senior Conductor onboard the train who will arrange for the ramp to be put in place.

Changes and disruption to services

When a journey changes, or we experience disruption to services, we will provide information about changes to train times, and alternative travel arrangements, in both aural and visual formats by Public Address announcements and Information Screens displayed at stations.

Where reasonably practicable, for significant changes and disruption during a journey, Senior Conductors will pass through the train to check if customers require further support, and where possible, provide assistance as required.

Our Mobile App, website and bespoke onboard portal show live train times, and help points are available at many stations alongside a Freephone number, providing a link to Customer Information teams who are also able to assist you in continuing your journey.

During planned engineering works, we provide clear information at stations and on our website and Social Media channels to advise passengers of alternative travel arrangements and replacement transport options.

X (formerly Twitter): @GC_Rail

Facebook: facebook.com/grandcentralrail

Occasionally a train's departure platform needs to be changed at short notice. Such a change will be shown on the customer information screens and will be announced aurally as soon as possible. When a change occurs, station staff where available will provide assistance and information to help you reach the revised departure platform, if it is accessible to you, as efficiently as possible. In the unlikely event the platform is not accessible to you, we will arrange alternative transport, for example, a taxi, to the nearest station accessible to you, so that you can continue your journey. We will discuss available options with you wherever possible.

Assistance with onward travel – buses, taxis and light rail

If your journey involves onward travel by another means of transport, where practicable, station staff will help you to the relevant bus stop, pick up point, or taxi rank within the station boundary. They are also able to provide information about local transport more generally, including bus services and taxi companies.

Our Senior Conductors and Customer Service Assistants can provide assistance in getting you on or off the train, however they are not able to provide assistance around stations.

Information about the availability of accessible taxis which serve our stations is available from our Customer Relations team, who can also advise on local taxi firms who can provide accessible taxis. Where possible, this information is also included on station posters.

For further information on local bus and tram connections, contact Traveline on **0871 200 2233** or visit www.traveline.info

Assistance with luggage

We recognise that luggage can be difficult to manage in the station environment for many disabled and older people. If you need your luggage carried, please tell us when you book assistance so we can ensure that station staff, where available, are ready to help. Assistance can be given in taking customers and their luggage from train to station entrances (and vice versa) and when transferring between trains; wherever reasonably practicable.

Rail staff must be able to lift luggage items safely, so please be aware of the luggage limits applicable on Grand Central train services in particular which state you may only bring three items of luggage – a maximum of one suitcase (no bigger than 30x70x90cm), a small carry-on bag and a handbag. Full details of the limits and free allowances are available from our Passenger Assist team.

Seats on trains

Our trains have priority seating which has extra legroom, space for an assistance dog and is situated near the doors. These seats are for customers with disabilities, pregnant women, those with impairments or non-visible disabilities and for older people. Priority seats are clearly labelled, and other passengers are requested to give up the seat, if required by an older or disabled person.

Wheelchair spaces and accessible toilets are available on all our trains, and our Senior Conductors assist in ensuring these dedicated spaces are kept clear and wheelchair users are given priority for this space.

Wheelchair spaces and priority seats can be reserved during the booking process and we recommend that you make a reservation in advance of travelling. However, if practicable, our Senior Conductors will make every effort to help older and disabled passengers find a seat on-board if you have not made a reservation.

Assistance dogs

Assistance dogs are welcome on all Grand Central trains, free of charge, and can travel in any part of the train. Our Senior Conductors will be happy to ensure that you are in the most appropriate seating on board the train, to make the journey comfortable for both you and your dog. Our priority seats have extra leg room and space for an assistance dog.

Information provision

Our Accessible Travel Policy leaflet for customers – Making Rail Accessible

To complement this Accessible Travel Policy document, our customer leaflet, ‘Making Rail Accessible’ provides a shorter, practical guide, explaining what we do to assist older and disabled customers who travel with us and the standards of service they can reasonably expect.

It is available on our website in PDF format at www.grandcentralrail.com/help/travel-assistance/passenger-assistance which is accessible using screen readers or other software with accessibility features (for example, Adobe Reader) and can be easily accessed via personal mobile devices.

Alternative formats such as audio and large print versions of both this Policy document and our “Making Rail Accessible” leaflet are available on request, by calling our Customer Relations by phone or Text Relay, and on our website, free of charge. We aim to provide this to you within seven working days.

Where possible we also display poster notices, at a height accessible to wheelchair users, at each station Grand Central serves, advising customers how to obtain the Making Rail Accessible leaflet and this policy document.

Trains and Stations accessibility information

We will ensure that accessibility information relating to our trains and the stations we serve is readily available to you and is kept up to date. This includes the level of step-free access available at each of the stations that we serve.

In order to achieve this, we will maintain this information in an online PDF format, available at: www.grandcentralrail.com/help/travel-assistance, which is accessible using screen readers or other software with accessibility features (for example, Adobe Reader) and can be easily accessed via personal mobile devices.

Alternative formats such as audio and large print versions of this information are available on request, by calling our Customer Relations by phone or Text Relay, and on our website, free of charge. We aim to provide this to you within seven working days.

We will also provide the same information for use on the National Rail Enquiries website to ensure consistency of information.

Train accessibility information

Grand Central now has a mixed fleet of x10 Adelante Class 180 units and x2 Voyager Class 221 units.

An overview of each type of Grand Central train is available on our website www.grandcentralrail.com/travelling-with-gc/on-board/our-trains/, including information on the general accessibility of each type and details of the routes on which different types of train are scheduled to run.

Following significant investment by Grand Central in refurbishing our train fleet, all Grand Central trains offer:

- Two wheelchair spaces available to book (one in first class and one in standard with associated companion seats)
- At least one accessible toilet; on our Voyager Class 221 trains, all 5 toilets are accessible
- A boarding ramp
- Designated priority seating
- Aural information
- Visual information
- A Senior Conductor to provide assistance during the journey on every train.

Station accessibility information

For information on whether the following accessible services and facilities are available at stations served by Grand Central, please visit www.nationalrail.co.uk/stations_destinations/ which will cover:

- Level of platform accessibility and how access is provided (e.g. lifts, ramps or steps)
- Disabled Passenger parking
- Accessible set down and pick-up points
- Ticket office opening hours
- Meeting Points for assistance
- Staffing hours and assistance availability
- Accessible ticket machines
- Customer information systems
- Help Points (either staffed or audio contact with our Customer Relations)
- Accessible toilets (including National Key toilets)
- Induction loops
- Tactile paving
- Station wheelchair availability
- Accessible waterproof waiting facilities
- Catering facilities
- Secure station accreditation.

Passenger journey information

We understand it is important for you to trust and have confidence in the information we provide. Some customers may travel by rail infrequently, and therefore may not know where or how to access important information, particularly during delays or during times of disruption. This section explains how we communicate accurate, clear and consistent information to you, especially if you have non-visible and sensory disabilities, at every stage of the journey – whether at home, online, on the move, at the station or on the train.

Stations – aural and visual information

All the stations that we serve have a combination of customer information screens and automated public announcements providing accurate, clear and consistent aural and visual information.

At larger stations, a train's departure platform will sometimes need to be changed at short notice. The platform number will flash on the information screen to indicate that it has changed and the same information will be announced aurally as soon as practicable.

When a change occurs at staffed stations, where possible, the platform staff will provide assistance and information to help you reach the revised departure platform, if accessible to you, as efficiently as possible.

In the unlikely event the platform is not accessible to you, the station staff will discuss options with you and liaise with us to arrange alternative transport. For example, a taxi, to the next nearest station accessible to you, so that you can continue your journey.

At the majority of stations we serve, accessible Help Points, and a Freephone number, are in place that enable customers to speak with a member of Customer Relations who will provide any information you require for your journey.

Trains – aural and visual information

We are committed to providing important aural and visual travel information on board the train in a format which is easy to understand.

All our trains are fitted with information screens and a public address system, and our Senior Conductors are trained to make clear and concise announcements giving train information, including details of the next station and will do so on all services that do not have pre-recorded announcements. Most recently we have initiated a project to re-record all our auto-announcements onboard our fleet of x10 Class 180 trains to ensure all content and format is up to date.

Senior Conductors are also trained to consider the needs of visually impaired, deaf or hearing-impaired people, when providing information. If your journey is disrupted, the Senior Conductor where possible may walk through the train to provide information and support customers.

Announcements will provide enough time for you to prepare to alight the train, particularly if you require assistance.

Our Senior Conductors are also trained to consider information provision and assistance requirements on a dynamic basis relevant to journey circumstances, for instance considering the impact of crowding on board our trains which will influence how information about access to (as opposed to just provision of) accessible toilets on crowded services will be communicated.

Senior Conductors have a smart device and can look up and pass on disruption information as well as details of connecting services, facilities at stations and real-time information regarding train times.

Connections and wayfinding

We work closely with Network Rail and the operators who manage the stations that we serve, and with relevant local authorities, to ensure that stations are clearly and consistently signposted from local roads. We also liaise with station operators and local authorities in the maintenance of Station Travel Plans for many of the stations that we serve, which include signage and interchange for other modes of transport. This is the responsibility of our Head of Customer Engagement.

We are investing in stations, and part of this investment contributes to replacing and renewing signs that are no longer fit for purpose. In making these changes we liaise with Network Rail and the station operator to consider industry best practice.

Our Passenger Assist booking team, onboard Senior Conductors and station staff will provide you with information on how to make connections with other modes of transport, both prior to your journey and when travelling on our trains or at stations that we serve. There is also a useful information poster displayed at many stations served by Grand Central which provides onward connection information and local maps.

Information points, Help Points and our Customer Relations team

Larger stations that we serve, such as York and London Kings Cross, have dedicated information points located on the station concourse, with clear signage to their location within the station. The information points have variable height counters with information screens and leaflets positioned so that they can be accessed by everyone.

At staffed stations that we serve, information on provision of services is available in person at ticket offices, which are clearly signed within the station environment and from station staff. In addition, accessible help points are available, which will put you in contact with a Customer Service team who will provide any information you require for your journey.

At unstaffed stations, accessible Help Points are usually in place that enable customers to speak with a Customer Service team who will provide any information you require for your journey. In addition, an information poster is displayed at a height that can easily be read by a wheelchair user, at all stations served by Grand Central, which provides relevant contact details for our Customer Relations support team.

We are committed to ensuring our staff, whether in person at stations and on the train, or via phone/ email to our Customer Relations support team, have up-to-date information available to them that includes:

- The facilities, services and accessibility of all the stations at which Grand Central trains call
- Timetables for all Grand Central services
- Information on fares and ticketing
- Information relating to connections with other operators' train services
- Information regarding accessibility onto other forms of transport
- Delays, disruption, diversions and emergencies which affect the advertised timetable
- Confirmation of any arrangements that have been made through Passenger Assist, including bookings by other operators.

Ticketing and fares

If you are unable to buy a ticket before your journey, you can do so during the journey or at the destination station and enjoy any reduction to which you are entitled, such as using a Disabled Persons Railcard. Our “Buy on Board” policy means no one will incur a fine or penalty.

We understand that disabilities are not always visible and if you are concerned about purchasing tickets, please contact staff on stations or on trains or our Customer Relations team for advice.

Along with all other train operators, we participate in several schemes offering discounted fares, which are detailed below.

Disabled Persons Railcard

The Disabled Persons Railcard is a discount card for tickets that allows those living with disabilities to save up to 1/3 on rail travel. If you're travelling with another adult, they will also receive 1/3 off their rail fare.

There are no time restrictions on the Disabled Persons Railcard, so you can use it to get a discount on tickets at any time of the day. Further details of eligibility criteria and how to apply for a Railcard can be found at:

Website: www.disabledpersons-railcard.co.uk

Email: disability@raildeliverygroup.com

Call: 0345 605 0525

Textphone: 0345 601 0132 (for people with hearing impairments)

Disabled Persons Railcard discounts are available on tickets sold by our Senior Conductors and on our website and mobile app. The discounts are also available when buying tickets through station ticket offices and automated ticket vending machines – these are controlled and operated independently from Grand Central by the respective station operators.

When purchasing a ticket on our website, there are prominent messages in place to advise customers that assistance is available for their journey.

If you are visually impaired

If you are a visually impaired person travelling with a companion and you do not hold a Railcard, the following discounts on Anytime/Day tickets apply for both of you:

- Anytime Single or Return – 34% discount
- Anytime Day Single – 34% discount
- Anytime Day Return – 50% discount

No concession applies if you are travelling alone and you do not hold a railcard.

To obtain these discounts a document confirming your disability, issued by a recognised institution (for example Government Department, Local Authority, Guide Dog Ownership certification or RNIB) is required.

Further details regarding eligibility are available on the National Rail website in the following link -

www.nationalrail.co.uk/tickets-railcards-offers/promotions/visually-impaired-customer-without-a-railcard

The discount is currently only available for customers at the point of ticket purchase from a staffed ticket retailing facility.

If you remain in your wheelchair for a rail journey

If you remain in your wheelchair throughout the journey and you do not hold a Railcard, the following discounts on Anytime/Day tickets will apply:

- Anytime Single/Return – 34% discount
- Anytime Day Single – 34% discount
- Anytime Day Return – 50% discount

The same discount will apply for one person travelling with you.

Further details regarding eligibility are available on the National Rail website in the following link -

www.nationalrail.co.uk/tickets-railcards-offers/promotions/wheelchair-user-without-a-railcard

The discount is currently only available for customers at the point of ticket purchase from a staffed ticket retailing facility.

Senior Railcard

Available to anyone over the age of 60, a Senior Railcard provides the opportunity to save up to 1/3 on rail travel in the UK. Senior Railcards can be purchased online, over the phone or at any station ticket office with your passport or UK driving licence as proof of age.

Further details of eligibility criteria and how to apply for a get a railcard can be found at:

Website: www.senior-railcard.co.uk

Email: railcardhelp@railcards-online.co.uk

Call: 0345 300 0250

There may be other Railcards which are suitable for you. Please visit www.railcard.co.uk for further information.

Purchase of advance tickets

Advance purchase tickets are for a specific train. Where advance tickets are available for purchase, we advise that you check that the required facilities (for example, a wheelchair space) are available for the entire journey you are making before purchasing tickets. This may particularly apply for through journeys involving more than one train operator. If you purchase tickets via our website or mobile app for a journey involving multiple operators, we advise that you check with each operator regarding the specific facilities they offer on their trains, or alternatively contact our Passenger Assist team who will check on your behalf.

Alternative accessible transport

If a station you wish to travel from is inaccessible to you, we will provide alternative transport, at no extra charge, to the nearest or most convenient station to enable you to continue your journey. For example, if there is only access via steps to some or all platforms, we will arrange alternative accessible road transport (such as a taxi) for you to the nearest suitable alternative station that is accessible to you. Please contact our Passenger Assist team, who will discuss your needs in order to arrange appropriate assistance. We recognise that circumstances will vary for individual passengers, and we will take into account your specific needs when discussing alternative transport options. Similarly, if you are unsure whether the station you intend to use is accessible to you, please contact our Passenger Assist team.

Wherever possible, we aim to ensure you can travel by rail for as much of your journey as is practicable.

When we cannot run rail services due to engineering work or a replacement timetable, we aim to use rail replacement buses or coaches which are fully accessible. Grand Central is working with our regular suppliers for rail replacement transport so that, when available, fully accessible vehicles are provided. For in scope rail replacement journeys, wherever possible this includes vehicles compliant with Public Service Vehicles Accessible Information Regulations (PSV(AI)R) as part of our readiness planning ahead of the anticipated end of the exemption for rail replacement vehicles on 31 July 2026. There is currently a shortage in the market of compliant rail replacement vehicles, in particular for longer distance journeys, therefore if a vehicle does not meet your needs, we will provide alternative transport options, which station staff or our Passenger Assist team will discuss with you.

When we cannot run rail services due to short notice disruption to advertised train services, for whatever reason, we will use the same approach as outlined above.

Mobility scooters and mobility aids

Wheelchairs

All Grand Central trains can accommodate customers using a wheelchair, in the clearly designated spaces on board, providing they fit within the following dimensions:

Width: 700mm

Length: 1,200mm

Weight: 300kg (including the user)

If your wheelchair exceeds the above dimensions, please contact our Passenger Assist team on 0345 603 4852 option 1 (open 7 days, 24 hours, excluding Christmas Day) who will be able to offer advice.

If you ring to book assistance or use our online assistance form for your journey, and you are travelling with a family member or companion, you can request a companion seat.

Electric Mobility Scooters

We recognise that scooters come in a variety of shapes and sizes and we try to accommodate these on board our trains if they fit within the specifications shown below. All our trains have designated wheelchair spaces, however there is a limitation on the footprint available to allow access to this space. In the situation where the mobility scooter is larger than the specification below, then these will be unable to access the coach from the vestibule area. . Please note mobility scooters and motorised wheelchairs cannot be charged on board Grand Central Trains

- 700mm wide
- 1,200mm long
- Have a turning circle radius of no more than 1,500mm
- 300kg (including the user)
- Have an anti-tip device
- Footprint: Triangular - 1/2 wheels at front close together. Square - 4 wheels spaced evenly apart

We can also convey foldable scooters as luggage as long as these can be lifted by our staff or by accompanying persons.

We request that mobility scooter users transfer to a seat, rather than remain seated on their scooter while on board the train.

Other train operators and transport companies may not take your mobility scooter on board. If you need to travel with another train operator or transport company for your trip, please make sure you check their arrangements for travelling with mobility scooters.

Delays, disruption to facilities and services, and emergencies

We understand that disruption to facilities and train services can have a significant impact on a wide range of disabled travellers and the confidence of disabled people and other passengers with reduced mobility in travelling by train. Where disruption occurs, Grand Central is committed to doing everything possible to ensure that, wherever possible, customers are able to continue their journey.

During disruption we will provide information about changes to train times and alternative travel arrangements through the Public Address and Customer Information Screens. Our App and website will include live departure times and passengers can use Help Points, where they are provided, to find further information.

In addition, at larger staffed stations, where reasonably practicable, we seek to ensure staff are deployed to the station concourse and platforms to assist and support customers with alternative transport arrangements and other needs such as luggage. In the event of service disruption, we aim to use rail replacement buses or coaches which are fully accessible. We work with regular suppliers for rail replacement transport so that we can request fully accessible and compliant vehicles are provided during periods of disruption. However, this is sometimes more challenging when sourcing vehicles at short notice, particularly as the availability of accessible vehicles can be limited in some geographical areas.

In the event of service disruption, that a vehicle does not meet your needs, we will provide alternative transport options, which the station staff or our Passenger Assist team will discuss with you. We will make all reasonable endeavours to secure accessible, compliant rail replacements buses, coaches and taxis. If we are unable to secure accessible vehicles that are appropriate for the routes they would be used on, we will explain the reasons why.

Sometimes, particularly at larger stations, a train's departure platform will occasionally need to be changed at short notice. The platform number will flash on the information screen to indicate that it has changed and the same information will be announced aurally as soon as practicable.

When a change occurs at staffed stations, where possible, the station staff will provide assistance and information to help you reach the revised departure platform, if accessible to you, as efficiently as possible.

In the unlikely event the platform is not accessible to you, we will arrange alternative transport, for example, a taxi, to the nearest station accessible to you, so that you can continue your journey. We will discuss available options with you wherever possible.

If you have booked through Passenger Assist and any disruption to the advertised train service means your original arrangements, including connections are no longer valid, we will do our best to make contact with you and re-book any required assistance through Passenger Assist. We will request a contact number from you when you book assistance, which will help us to contact you in case of disruption. If we are unable to contact you for whatever reason, and disruption occurs during your journey, please ask station staff or our on-board Senior Conductor for help.

When the level of accessibility of facilities at a station or on one of our trains is less than that normally

provided, for example as a result of lifts breaking down or toilets being out of use, we are committed to making every reasonable effort to provide replacement arrangements or facilities, wherever possible. This may involve making alternative transport arrangements for you to or from the nearest fully accessible station in the event of station lifts being out of order.

Emergency procedures

All staffed stations that we serve have a local emergency plan which details the actions that station staff must take in an emergency. These plans include detailed evacuation arrangements and take into account the needs of disabled and older customers, including those who use mobility scooters and wheelchairs. If you are a wheelchair user and you are in an area where no safe evacuation route exists, a place of safety will have been pre-identified for you (accompanied by a member of staff) to await rescue by the emergency services.

The assistance provided to disabled passengers varies between locations based upon a risk assessment and includes the need to identify those who may need assistance, provision of wheelchairs and ramps and identification of and direction to safe refuge if normal evacuation routes are not accessible.

When onboard our trains, our policy is not to evacuate wheelchair passengers or other passengers with significantly reduced mobility without the support of the emergency services unless the situation is life-threatening. Dependent on the type of incident and risks involved, we may move you to a safer part of the train until arrangements can be made to move the train to the nearest station. We will endeavour to ensure you are accompanied at all times. If it becomes essential to evacuate a train between stations, we will work closely with the emergency services to attend and provide assistance with the evacuation.

Station facilities and services

We are committed to ensuring that the information regarding the stations served by Grand Central is up to date and customers requiring assistance are aware of any limitations and / or temporary changes or restrictions. For example, this includes:

- where stations have a physical constraint that prevents some disabled people from using it;
- where significant temporary work that affects station accessibility is being carried out;
- where there are changes to stations that would make them temporarily inaccessible (e.g. when facilities such as lifts and toilets at stations are out of order); and
- where facilities on trains that materially affect disabled passengers' journeys are unavailable.

Our Head of Customer Engagement has overall responsibility for ensuring the information provided by Grand Central regarding accessibility and details of the times assistance from staff is available at stations is updated, including:

- Level of accessibility from station entrance to platforms (e.g. lifts, ramps, steps)
- Staffing hours and assistance availability
- Location of Meeting Points for assistance
- Accessible waiting rooms and toilets
- Accessible car parking and set down/pick-up points

Left Luggage: Of the stations served by Grand Central trains, only London Kings Cross offers a facility to leave luggage. "Excess Baggage" offers this facility, operating independently. This facility is available Monday to Sunday 07:00 – 23:00. You can pre-book storage for any heavy, awkward or high value luggage at the station, by visiting their website (www.left-baggage.co.uk) or by calling 020 7837 4334.

Disabled Parking: We work closely with Station Operators to ensure the availability of appropriate car park and disabled parking facilities. Only Sunderland, London Kings Cross and Bradford Interchange do not have station car parks, relying on a wide range of accessible transport options that can be used to get to the stations. For all the remainder, if you visit our website at www.grandcentralrail.com/stations/a-to-z/ the station facilities are outlined alongside the number of parking spaces. The number of disabled parking spaces at each station is also listed as well as any charges for using the car parks. Where our customers feedback any issues regarding parking facilities, we will ensure these are passed to the relevant station operator for their action.

For full details please visit the National Rail Enquiries website at www.nationalrail.co.uk/stations.

Alterations to facilities

When advertised facilities and services such as lifts or accessible toilets are not available, at a station or on-board our trains, we will make every effort to provide alternative facilities.

Should the facilities on which you rely for your journey become temporarily unavailable on a train or at a station, we will update the system within 24 hours of notification of a problem and provide an estimated time for when the facility will be functioning again. If we have your contact details our Passenger Assist team will endeavour to contact you by email or telephone, to make every effort to provide alternative facilities or arrangements, this includes:

- Where stations have a physical constraint preventing use by some disabled people;
- Where significant temporary work affects station accessibility;
- Where changes to stations make them temporarily inaccessible (e.g. lifts or station toilets out of order);
- Where changes to train facilities materially affect disabled customers; and
- Emergency engineering work

Our commitment to provide this information includes instances when stations or trains become inaccessible in the short or longer term. This information will be available to station staff and to you through our website, our Passenger Assist team and via station Help Points. As part of our ongoing review process, we will update the information on our website to ensure the details are current.

Redress: what to do if something goes wrong with assistance

Customers are at the heart of all that we do, and we work hard to ensure we deliver assistance in the right way for every journey. However, sometimes things go wrong, and we may not be able to provide the level of service that we promised.

If assistance has not been provided in the way you expected, whether you booked in advance or not, please contact our Customer Relations team. We will investigate why this happened and provide a full explanation to you as well as what action we intend to take to ensure it does not reoccur.

We understand the inconvenience caused when assistance is not delivered, so we will also provide you with appropriate redress for your journey which we will assess on an individual case by case basis. Redress may take the form of compensation, an apology and/or a gesture of goodwill and is not limited to the price you paid for your ticket. This is separate to our charter delay compensation scheme. The full redress process may take up to 40 working days for us to investigate and respond, although we do resolve most complaints significantly quicker than that.

If you are not happy with the response you have received from us, you can appeal to the Rail Ombudsman using the contact details below:

- **Website:** railombudsman.org
- **Call:** 0330 094 0362
- **Textphone:** 0330 094 0363
- **Email:** info@railombudsman.org
- **Twitter:** @RailOmbudsman
- **Post:** FREEPOST – RAIL OMBUDSMAN

We aim to make the process of raising an issue as simple as possible, so we provide details of how to do so in our Making Rail Accessible leaflet and on our website: www.grandcentralrail.com/help/travel-assistance

If you travelled with multiple operators we will coordinate a single response. If assistance that failed to be delivered was when travelling on another operator's train, to ensure you receive the best response, we may transfer you to that operator. We will always ask for your consent prior to doing this.

Our arrangements do not affect or limit any rights you have as a consumer under, for example, The Consumer Rights Act 2015, to a different level of compensation, including consequential loss, where Grand Central is at fault.

If you believe that it does apply to your journey, please contact our Customer Relations team on **0345 603 4852**. We always consider each claim made to us on its individual merits.

Strategy and management

In this section we set out how we:

- Embed the provision of services to disabled people within our business and our project planning
- Will continue to improve access to the railways for disabled people and those with reduced mobility
- Ensure our staff have the resources, skills and confidence to deliver assistance to customers
- Measure the success of our Accessible Travel Policies.

Strategy

Grand Central strives to provide rail services which are truly accessible to all, so that customers can travel in confidence, safe in the knowledge that extra help is available at each stage of their journey, when needed.

We are committed to assisting and enabling people to use the railways confidently, taking into account the wide range of different needs of disabled and older people, and continuously improving the quality and reliability of assistance available.

We work with our rail industry colleagues, regulatory authorities, the Rail Delivery Group, Disabled Persons Transport Advisory Committee (DPTAC), Transport Focus, Community Rail Partnerships, Rail Ombudsman and other stakeholder organisations, especially those representing all customers, to further improve the information, facilities and services we provide.

Our Accessible Travel Policy fulfils our obligations under our Passenger Services Operator Licences and the ORR Accessible Travel Policy Guidance (October 2025) and takes into account the provisions within the Equality Act 2010.

We will ensure that all projects which replace and/or renew facilities on our trains are designed to meet the standards of the Persons of Reduced Mobility Technical Specification for Interoperability (PRM-TSI) regulations. As we do not manage or operate any Stations, we cannot make a similar commitment to station facility accessibility improvements, however we work with Station Operators and Network Rail to improve these facilities where possible, including financial contribution where appropriate.

Management arrangements

The provision of services to disabled and older people is an integral part of our business planning process, championed by our Head of Customer Engagement.

Establishing and maintaining our Accessible Travel Policy is a condition of our Passenger Service Operator Licence. For compliance purposes the Director, Grand Central is accountable for our licence.

Our Head of Customer Engagement has responsibility for implementing our Accessible Travel Policy. This includes consulting with disabled people, community groups, and charities to understand where services and facilities do not meet the needs of disabled people and then working with the internal teams to prioritise funding requests and tie in with other projects where possible. This role will liaise with the relevant directorates and managers across the Grand Central business to work on the specific tasks that compliance with the Accessible Travel Policy necessitates.

Monitoring and evaluation

We have a culture of “Belief in Better” and strive for continuous improvement and will therefore measure the quality of service relating to assistance provided.

The tools that we will routinely use to measure the quality of service given to disabled passengers include:

- Monitoring complaints about assistance;
- Monitoring complaints about facilities being inaccessible;
- Rail Customer Experience Survey results relating to accessibility;
- Feedback from ‘RAIFN – Rail Accessibility & Inclusion for the North’ who are engaged as Grand Central’s Accessibility User Group;
- Using Passenger Assist booking data to track trends in assisted booking and monitor growth and usage; and
- Providing post-travel surveys for customers who have booked assistance to give feedback on their experience. These will complement the ORR’s national survey of Passenger Assist users and help us better understand customer needs.

Periodic progress reports and core data on performance will be provided to the Board of Directors and to the ORR, highlighting the action Grand Central is taking on improving travel for disabled and older people, and our performance against the metrics we set out.

We will review this policy annually to include details of the achievements of objectives, new initiatives to improve our service to disabled customers and any difficulties we have encountered with the implementation of this policy.

Working with disabled customers, local communities and local authorities

In preparing our Accessible Travel Policy we have taken feedback from a cross-section of disability stakeholders. Specifically, we have engaged with Transport Focus, the Rail Complaints Ombudsman, and the RDG's Accessibility Working Group concerning our ongoing accessibility and inclusion proposals and the development of our accessible travel policies. Key organisations that represent the interests of customers with disabilities – including the Office for Rail and Road, the Disabled Persons Transport Advisory Committee and Transport Focus – have reviewed our Accessible Travel Policy.

There are several key industry partners that we work with to improve the accessibility of our services. For example:

- Network Rail – collaboration on station improvements
- Transport Focus – understanding research on customer priorities
- Passenger Transport Executives – involvement in the creation and delivery of regional transport policies

We are in regular contact with key stakeholders through our Customer and Stakeholder Engagement Strategy. This sets out how we engage with all our customers, potential customers and other stakeholders in the communities we serve to understand and respond to their experiences. These stakeholders include:

- Local authorities
- Disability groups
- Community groups
- Rail user groups and Community Rail Partnerships

At a national level, we liaise with national organisations such as Age UK, Scope and RNIB via our trade body the Rail Delivery Group (RDG). Grand Central participate in a regular forum of disabled passengers called Rail Accessibility and Inclusion for the North (RAIFN). This forum meets periodically and has just been re-constituted under a new Chair. Grand Central work with these groups and forum to ensure that passenger's voices are heard and fed back to help service improvements.

We will actively promote the availability of assisted travel, with a particular focus on the customer leaflet, 'Making Rail Accessible'. As well as ensuring this leaflet is available to our RAIFN forum members and at staffed stations our trains call at, in prominent locations where public services are provided and online, we will also advertise the leaflet on station posters, on train services and via social media.

Staff training

We know that staff training plays an important part of delivering a railway which is accessible for everyone, by giving Grand Central colleagues the skills and understanding they need to consider accessibility in everything we do.

For 2026 we have undertaken a full update on our staff training materials which includes the lived experience of older and disabled people who use the railway, and which again brings to life and demonstrates the importance of providing assistance, the individual personal impact of the services we provide, and the decisions we make. In this latest update we have used video footage of colleagues in the business who have lived experience of disability – content that has powerful resonance with our staff due to their personal connection with the individuals featured.. New starters are given this updated training package as part of their induction and a shorter form of the updated training is provided for all staff on a two-yearly cycle. The latest refresh cycle of the shorter form training will also be provided for our volunteer Ambassadors who support our services at many unmanned stations where we call on Sundays, providing valuable customer service and a reassuring presence assisting customers with any queries or issues.

Training outcomes

The Office for Rail and Road have set out in their guidance nine mandatory training outcomes, which our new updated training includes:

1. Understanding disabled people and their everyday challenges: challenging misconceptions and understanding barriers to access and inclusion.
2. Equality Legislation: exploring and understanding the Equality Act 2010.
3. Defining Disability: an introduction to the various definitions of disability and the appropriate terminology.
4. Recognising passengers who need assistance: exploring physical and non-physical impairments to enable staff to assess individual needs and provide appropriate assistance.
5. Railway Regulatory Framework: understanding regulations and policies that are relevant within the railway industry.
6. Passenger Assist: how it works for disabled passengers and the role of railway staff in delivering the service.
7. Communication: finding a way to communicate with disabled people with patience, respect and dignity.
8. Accessibility in stations: the identification of accessible features at the stations where staff work as well as at the key destination stations on the Grand Central network.

9. Providing safe assistance: duties and process to ensure that both staff and customers remain safe at all times, including:

- The use of equipment provided to assist older people and those with disabilities, such as ramps, station wheelchairs and induction loops
- Communicating with people with different disabilities
- Communicating clearly by phone with people who may have difficulty speaking, hearing or understanding.

The learning objective for our updated training is to refresh and build our colleagues knowledge and skills to enable them to best meet the needs of customers who have disabilities and/or require our support, in accordance with both the law, The Equality Act 2010 and Grand Central's commitment to further improve the accessibility of our services for all of our customers.

Our Customer Relations, Passenger Assist and Social Media teams also receive specifically designed training for communicating clearly with people who may have difficulty speaking, hearing or understanding. This is designed to help them understand the importance of:

- Clarity of speech
- Intonation
- Emphasis
- Timeliness
- Language.

Training delivery will be supported by our specialist training -manager, working with Grand Central's Accessibility team using a "train the trainer" approach. Together they are the internal subject matter experts, providing advice and materials in support of all colleagues and will help monitor our performance.

As a result of our ongoing disability training cycle, all current customer facing Grand Central staff and relevant management will have met the mandatory training outcomes set out above. All new Grand Central staff, including managers and support roles, as part of their induction, will also receive our updated training.

Where reasonably practicable, we will ensure that any agency or temporary staff that interact with customers receive an appropriate level of disability awareness training, which will focus on Passenger Assist, communication and providing safe assistance, as outlined in outcomes 6, 7 and 9 in the mandatory training guidance noted by the ORR.

Similarly, wherever reasonably practicable, we will require the operators of rail replacement bus and coach services and taxi firms to ensure the driver of their vehicles have received appropriate training, as outlined in outcomes 6, 7 and 9 in the ORR training guidance. In these instances the training will be designed by our specialist training manager and training materials (this includes work books and leaflets) created given to the operators. Delivery and compliance with this training will be monitored through our road transport contract provider.

Furthermore, anyone employed at a contact centre who provides information or advice directly to passengers on our behalf will receive an appropriate version of the Grand Central training course covering, as a minimum, the Passenger Assist service and customer communication.

In summary, having completed the initial training commitment, all Grand Central staff will receive the updated refresher training within two years, and as a minimum every two years thereafter, in order to ensure the mandatory training outcomes described above are maintained.

We will provide a regular report to ORR setting out progress against delivery of these staff training commitments.
